

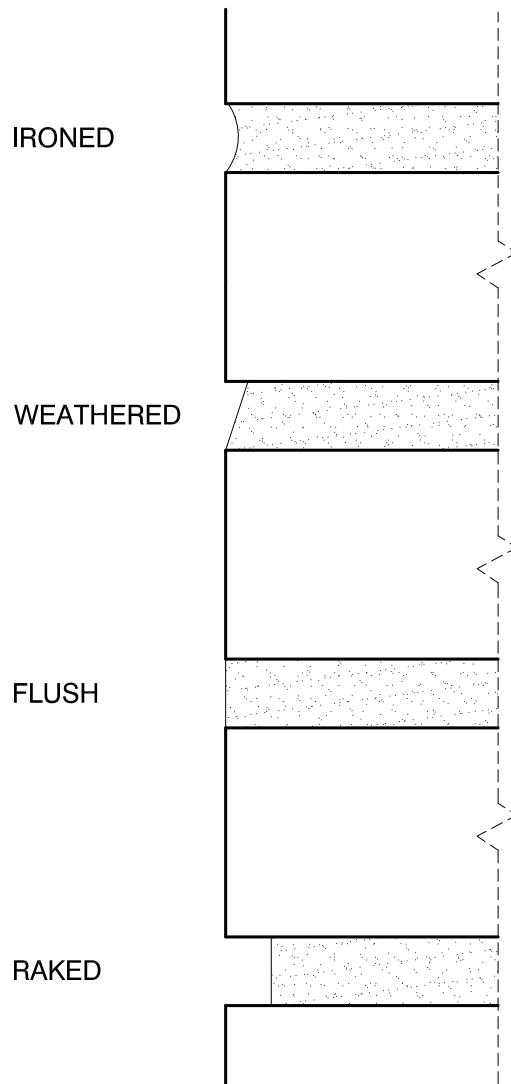

FIG. 95 MORTAR JOINTS

NOTES:

1. Mortar joints make up approximately 17% of the surface area of the wall and mortar colour plays an important part of the overall appearance.
2. All joints should be tooled smooth to seal the joint and extend its durability.
3. Mix mortars by volume to ensure consistency of colour.
4. Prior to commencing the job make up sample panels, wait 24 hours to dry, before making a final decision.
