290mm long x 162mm high x 90mm wide*

*Available on consignment only

Colours shown are indicative only and should not be used for final selection

RENDER BRICK

The look of plaster with the security of clay brick veneer.

Our Maxi Render Clay Brick has been made specifically to be plastered over and in conjunction with our Clay Lintels provides an economical substrate.

The Maxi series, which comes in both 70mm and 90mm, provides a cavity between the clay brick veneer and the framing which allows for any moisture to escape giving you peace of mind in your plaster home.

MAXI RENDER BRICK 70
305mm x 162mm x 70mm

MAXI RENDER BRICK 90
305mm x 162mm x 90mm

Maxi Render Brick 70 & 90 Series

18.5 bricks per square metre
305mm long x 162mm high x 70mm wide
305mm long x 162mm high x 90mm wide

PAINTER BRICK

Even though Clay Bricks come in a variety of colours, textures and sizes, sometimes painting your clay bricks can create a cost effective and unique look.

We supply a variety of clay brick profiles suitable for painting in single through to double height.

Check availability with our representatives.

SMOOTH

TEXTURED

TEXTURED 120 HIGH

RENDER BRICK

NATURES DESIGNA SCHIST

There is nothing more durable, more natural or more breathtaking than stone produced by Mother Nature.

Introducing a modular stone system combining the ease of brick installation with the beauty of Natural Schist.

- Modular brick, block and panel systems already proven worldwide.
- Developed and tested for the New Zealand Market.
- Virtually maintenance and fade free; weather resistant and strong.
- Adds Value, Character and Natural Beauty.

PAVING RANGE

ASPENSTONE®

THINGS YOU NEED TO KNOW

IMPORTANT INFORMATION

- Clay fired bricks have natural variation in colour, finish and size. Midland Brick NZ recommends that all bricks be delivered at once for your project, from the same batch, to ensure colour consistency.
- We strongly recommend viewing of the product delivered to site. If there are any concerns about colour or quality, please contact your local distributor prior to installation.
- Tradespeople should take the appropriate measures to ensure the bricks are kept dry and clean during storage on site and installation.
- Your bricklayer is a professional tradesperson and should ensure that all product laid is of acceptable quality and blended from at least three pallets to provide consistency of colour and texture throughout the project. Product laid is deemed to be accepted.
- Midland Brick NZ does not warrant that their products will match the brochure or any particular sample or display, as the inherent variation in the manufacturing and printing process means these cannot be colour accurate.
- Some minor chipping and breakage can occur during delivery, offloading and installation of product. It is recommended this product is used for cuts and infills.
- Due to ongoing development Midland Brick NZ reserves the right to change and delete product lines and specifications without further notice.
- For any technical information please call your nearest distributor or refer to our website www.midlandbrick.co.nz

CHOOSE A MORTAR

Mortar comprises about 15% of a clay brick wall surface and can dramatically change the overall appearance of your home simply by choosing a different mortar colour or joint style.

Mortar colour can be used to compliment or contrast with the brick. Complimentary tones give a more relaxed and harmonious feel, while contrasting mortar can be used to create a more formal, crisp and distinctive look.

For a maintenance free rendered look, oxide can be added to the mortar to match your clay bricks. This creates a very contemporary monochromatic finish.

Before you build your new home, discuss your ideas with your builder or a Midland Brick NZ representative.

CHOOSE A JOINT

The choice of mortar joint can be used to help create a casual, rustic or formal look to your home. Rolled joints create a clean contemporary finish and work well with nearly all clay brick styles.

Choosing a flush joint will give a flatter appearance and lighten the overall look of your brickwork. Whereas an inset, or square raked joint, can have a more dramatic effect by adding dimension and shadow to the look of your clay bricks.

MAINTENANCE

Kiln fired clay brickwork has a long history as one of the most durable and versatile building materials and subsequently, requires virtually no maintenance. However, as with all materials, brickwork can be subject to natural weathering such as rain, sun, wind and wind-borne sea spray.

In order to maintain a functioning brick veneer cavity, it is important to ensure that all weep holes and vent holes are kept clean and free of debris and spiders.

For specific instructions for cleaning brickwork, refer to our technical information by visiting our website www.midlandbrick.co.nz

A NATURAL LOOK

No two clay bricks will be identical which is what creates such a unique and natural look. The natural raw materials they contain as well as the kiln firing process creates variation in texture and colour from brick to brick.

BENEFITS OF CLAY BRICK

As one of the worlds oldest and most trusted sustainable building materials, clay bricks create an ageless home that will protect your family for generations to come.

NATURALLY CREATIVE

A creative range of textures, colours and sizes, make clay bricks a dream material for your home. Clay bricks are enduring and will not fade.

LOW MAINTENANCE

Clay bricks stay looking great without any painting or other treatments. They are capable of weathering harsh environmental conditions.

SUSTAINABILITY

Made from organic minerals and naturally abundant sources of clay, they can be reused and recycled. Clay bricks are the safe choice for you and the environment.

SOLID INVESTMENT

Clay bricks are renowned for their strength and longevity, giving security to your investment.

ENERGY EFFICIENT

The natural thermal insulating properties moderate the extremes in building temperatures, keeping it cool in summer and warm in winter, reducing energy consumption. Clay bricks increase the comfort of your home by blocking outside noise.
